Why Cardiac Medical Devices?

Build a rewarding career and make a difference in the lives of patients

Cardiac Device Clinical Specialists provide critical expertise to physicians and patients and ensure successful implantation and ongoing functionality of cardiac devices such as pacemakers. They also perform 3D mapping of the heart, providing expertise during complex electrophysiology procedures. Cardiac Clinical Specialists are hired by medical device companies and major healthcare systems.

Perform diagnostic tests and guide the physician during the procedure

Post-op patient follow-up and ongoing monitoring

Physician and hospital staff training & patient education
